## VIDEO SURVEYS //

➤ Austraffic is the industry leader in traffic and transport studies using modern Video Surveying techniques that are perfect for Origin Destination, Classification and Intersection Movement Surveys.

We have skilled representatives in every state with the knowledge, equipment and resources to successfully deliver the results you need.

### Innovative technology

Video surveying applications are:

- Portable
- Cost effective
- Battery or mains powered
- Flexible

and they are especially useful for managing personnel, resourcing and WH&S issues.

### Variety of applications

Video surveying techniques to optimise high traffic speeds (150km/h +), platooning vehicles; minimising human fatigue, or multiple human inputs.

- Origin destination surveys
- Classification surveys
- Intersection turning movement surveys
- Queue length & delay surveys
- Parking surveys
- Public transport surveys
- Pedestrian & bicycle surveys
- Dangerous goods transport.

### High vehicle sample

Video surveying techniques can determine movement of up to 99% of the population 24 hours a day (dependent on site conditions). No need to limit to a "white car" survey.

### Extensive classifications

Classification categories are no longer limited to what the surveyor can determine on the side of the road. Additional "overview" cameras can be set in place to capture a wide range of information, giving the end user greater flexibility in defining outcomes.

### Asset Management

Using vehicle mounted HD video with built-in GPS, Austraffic can document speed, altitude and location on an interactive map.

### Accurate auditable data

Each passing vehicle or individual is captured to the second and the results reviewed, audited and verified.

Our experienced staff can help you with the survey design, to ensure the best outcomes are achieved relative to your survey needs.

### Detailed analysis

Austraffic has superior analysis tools to produce accurate data matches and deliver the meaningful data reports you need.

- Excellence in resource planning and deployment
- Excellence in data integrity and validation
- Excellence in systems and software
- Excellence you can count on.
